

IN THE SPECIFICATION:

Please amend the specification as follows:

Paragraph beginning on page 3, at prenumbered line 15, has been amended as follows:

The external pocket 1 is a semi-closed pocket preferably made by a weave cloth, and includes but not limited to a latch device 12 such as a zipper or an adhesive tape disposed at one side of an opening 11, so that the external pocket 1 can be closed or opened. A pocket chamber 42 13 is formed inside the internal pocket 1 for accommodating the following components. In addition, the external pocket can be designed with different patterns or characters to stimulate the consumer's purchasing desire.

Paragraph beginning on page 4, at prenumbered line 9, has been amended as follows:

The filler 3 is ~~sued~~ used for filling up the pocket chamber 42 13 of the external pocket 1, so that the external pocket 1 remains in its shaped when it is in use. Therefore, the filler 3 should not be larger than the internal volume of the external pocket 1. For convenience, the filler 3 is preferably in the granular form of polyton or plastic polymer materials or resin cotton in lumps. However, this invention is not limited by the form of the filler 3. In the experiment conducted by the inventor, it shoes that it is preferably to have the filler 3 in the granular form.
